

I really like XM's broadcasting of local traffic. I work in an area that does not receive regular FM service, and I hate always having to find an FM signal to get the traffic report in Baltimore, so when I get closer, I know which highways to use and which ones to ignore. Also, the XM traffic channel has traffic all day long, all the time. It is timely, accurate and always there, unlike the FM stations that only do traffic reports every 10 or 20 minutes. I never have to wait for traffic information. XM has helped me on many occasions. Please don't take this valuable service away. Thank you,
Jay Biss
